SUMMARY

Data analyst with 3+ years of experience turning enterprise SaaS data into executive dashboards and decision-ready insights. Hands-on across the analytics stack: **SQL (Snowflake, Oracle, SQL Server)** for querying and transformation, **Tableau and Power BI** for visualization, and **Python and R** for statistical modeling. Partners with Sales, Client Success, Product, and senior leaders to turn data into action.

AREAS OF EXPERTISE

- BI Dashboard Development
- Data Modeling
- KPI Standardization & Metric Definition
- Data Quality & Validation
- Reporting Workflow Automation
- A/B Testing & Campaign Analysis
- Predictive Modeling & Forecasting
- Customer Segmentation & Retention
- Stakeholder Communication & Insights

TECHNICAL SKILLS

Languages: SQL, Python (Pandas, NumPy, Scikit-learn), R
Data Platforms: Snowflake, Oracle, MS SQL Server, PostgreSQL, Databricks, BigQuery, SSIS, Azure, AWS
BI & Tools: Tableau, Power BI, SSRS, Excel, Google Analytics, Git/GitHub, Jira

PROFESSIONAL EXPERIENCE

Business Systems Analyst | O.C. Tanner, Salt Lake City, UT **Dec 2023 – Nov 2026**

- Built and owned **two C-suite Tableau dashboards** for VPs and Chief Officers, including a recognition-moments view of **36M+ events/year**, saving **~6 hours/week** of manual executive-deck prep; also built Employee Appreciation Day and mobile engagement dashboards.
- Built an **SLA Expiring Agreements dashboard** (30/60/90-day views) across a **200+ client portfolio**, surfacing **~50 renewals/quarter** previously buried in spreadsheets and shifting Sales and Client Success to proactive renewals.
- Architected **Snowflake SQL workflows** that transform raw recognition, subscription, and survey data into governed datasets feeding **10+ Tableau dashboards** used by **20+ teams**, eliminating **~8 hours/week** of manual prep.
- Built a reusable **SQL-based anomaly-detection methodology** that scores e-card and nomination activity to flag unusual reciprocal giving patterns within recognition groups.
- Owned **CSAT/NPS analysis** for the Voice of the Customer program with **sentiment analysis** on open-text responses; findings presented by the Director at a **company-wide executive meeting**.
- Resolved **100+ analytics tickets** as sole analyst for Client Success with **1–2 business day** turnaround, using **Oracle SQL** root-cause investigations and ad hoc reporting to **reduce escalations to Engineering**.

Data and Reporting Analyst Intern | Utah Transit Authority, Salt Lake City, UT **Sep 2022 – Apr 2023**

- Reduced HR reporting errors by **~75%** by rebuilding **SSRS reports** on T-SQL queries in MS SQL Server with built-in validation logic.
- Built **Power BI dashboards** with custom KPIs to analyze ridership data for leaders across the organization.
- Designed **SSIS packages** to extract, transform, and load source data into target databases, improving report reliability and accuracy.

PROJECTS

Customer Retention & Revenue Analytics | BigQuery SQL, Tableau | Portfolio project on GitHub **2026**

- Cleaned and modeled **1M+ real retail transactions** in **BigQuery SQL** (raw → staging → analytics layers), resolving overlapping source files, 34K duplicate rows, and same-day order reversals, with totals reconciled across every layer.
- Ran **cohort retention** and **RFM segmentation**, finding 24% of customers drove 69% of sales while new-customer acquisition fell 49–66%; sized a **£94K–£281K win-back opportunity** and designed a controlled test to measure it.

EDUCATION

Master of Science, Business Analytics | University of Utah, David Eccles School of Business, Salt Lake City, UT
Bachelor of Engineering, Electronics and Communication Engineering | Panimalar Engineering College, Chennai, India
